

CORPORATE GROUP

QUALITY, SAFETY AND RELIABILITY
SINCE 1980

TOGETHER, WE ARE STRONG,
TOGETHER WE ARE SUCCESSFUL,
TOGETHER WE CREATE THE FUTURE.

Your specialist for operator and radio technology – with innovative technologies and a top-class range of products that is subject to a continuous process of refinement. SOMMER offers operator and radio automation solutions allowing you to open and close garage doors, doors, entrance gates and buildings via remote control. For precision, efficiency and convenience.

- garage door operators equipped with the travelling motor operator system developed by SOMMER
- motor carriage moves along a tensioned chain; no friction or power loss
- smooth-running and durable
- gentle transmission technology
- maintenance-free
- tested and certified to the latest standards with more than 1800 door-operator combinations
- founding member of BAS.T (Bundesverband Antriebs- und Steuerungstechnik)
- friendly and solution-oriented SOMMER service team

FRONT DOOR CONFIGURATOR - YOUR DREAM DOOR IS JUST A FEW CLICKS AWAY

With the configurator design tool, Groke gives you the opportunity to preview your dream door on your home in photo-realistic quality – from any camera angle. Using the digital template, you can virtually install a wide range of different models and modify colours and other details from your own computer.

Can be found at:

www.kreadoor.de

Step 1

Take a digital picture of the entrance to your home.

Step 2

Use the configurator to determine which front door is the best fit for your home's entrance.

Step 3

Select the ideal dimensions, style, colour, glass type, side sections/fanlight, and push/pull handle.

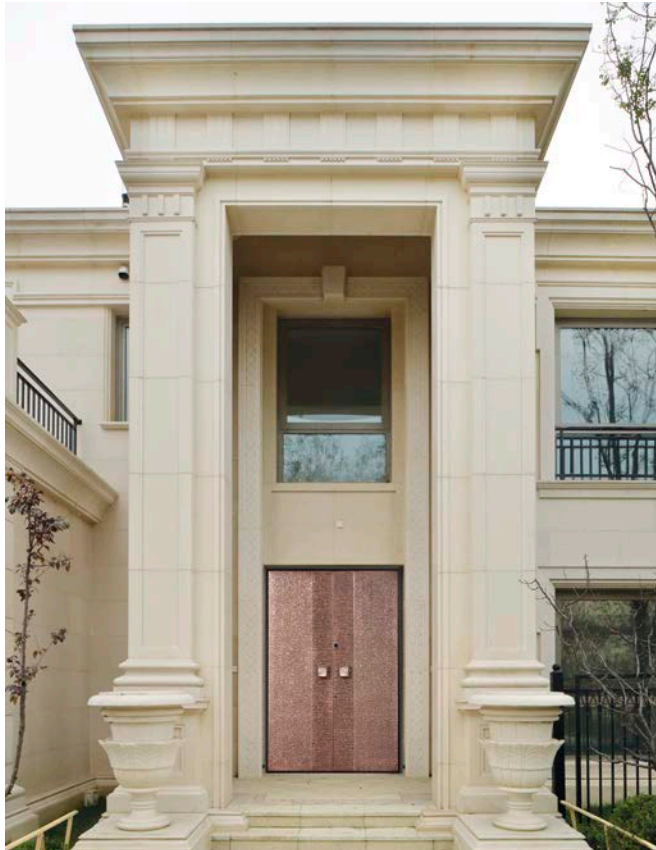

Step 4

A simple photo composition is all it takes to visually depict your bespoke dream door right in the entrance to your home. When you're finished, you can order the door from your Groke specialist retailer using the reference number.

Effective August 29, 2019, the corporate group has taken over metaku Metall- und Kunststoffbau GmbH in Breuna.

With 34 employees, it is the specialist for the production of entrance door panels. In this context, the merger of the locations Brilon and Breuna is planned. Further advantages await SOMMER in filling construction, in particular through the production of plastic fillings. In the future, metaku will also provide customers with a second-door brand with their own design available. Thus, the SOMMER Group offers the customer even more design variety.

Triebentbacher has been the German company in the field of metals for buildings **for more than eighty years.**

The Triebentbacher products can be found in some of the most beautiful buildings and in many public places in the world.

Triebentbacher has been part of the SOMMER Group since 1 May 2020. The product range includes: glass technology, stainless steel, wrought iron, gates and components, drive technology, barriers, radio technology, biometrics, smart homes, doors, canopies, letterbox and parcel box.

THE GROUP'S BUSINESS FIGURES

- group turnover in 2019: approx. € 170 mio.
- number of employees: more than 710
